Art Unit: 1724

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 6 and 12 are rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which Applicant regards as the invention. The trademark recited in claims 6 and 12 is deemed to render these claims indefinite, because the formula or characteristics of a product may change from time to time, and yet it may continue to be sold under the same trademark. See M.P.E.P. § 608.01(v).

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5, 7-9, 11 and 13 are rejected under 35
U.S.C. 102(b) as being clearly anticipated by Bernardi et al.
(U.S. Patent No. 5,931,196). See col. 1, lines 4-12; col. 2, lines 33-35 and 49-50; col. 4, lines 57-60; col. 5, lines 19-20; and col. 6, lines 9-16.

Serial Number: 09/976,892 Page 3

Art Unit: 1724

Claims 1-4 and 8 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Findlay et al. (U.S. Patent No. 3,213,881). See Fig. 1.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 6 and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bernardi et al. The reference discloses the claimed invention with the exception of the specific material from which the valve spool is constructed. However, it would have been obvious to one of ordinary skill in the art at the time the invention was made to construct the reference valve spool from the material recited in claims 6 and 12, since this reference clearly teaches that the valve components can be made from a wide variety of materials, including plastics (see col. 6, lines 9-16).

Claims 10 and 14-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Faylor et al. (U.S. Patent No. 3,870,033) in view of Bernardi et al. Faylor et al. discloses purifying and

Serial Number: 09/976,892 Page 4

Art Unit: 1724

circulating water in a loop (see Fig. 2), and diverting a portion of purified water to an end use (144). Accordingly, this primary reference discloses the claimed invention with the exception of the recited control valve. Bernardi et al. discloses a control valve of the type recited; and it would have been obvious to one of ordinary skill in the art at the time the invention was made to provide the system of Faylor et al. with the control valve of Bernardi et al., in order to control the flow of purified water through recirculation line 26 and usage line 142.

Iversen et al. (U.S. Patent No. 3,276,458) shows a similar water purification loop.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to I. Cintins whose telephone number is (703) 308-3840. The examiner can normally be reached on Monday through Friday from 8:30 AM to 5:00 PM.

The fax phone numbers for this art unit are: (703) 872-9311 for "Official" faxes after Final Rejection; (703) 872-9310 for all other "Official" faxes; and (703) 872-9492 for "Draft" and other "Unofficial" faxes.

Any inquiry of a general nature or relating to the status of this application should be directed to the Group receptionist whose telephone number is (703) 308-0661.
